

VENTILATION

Ventilation matters in your home

Fresh air is essential to the health of your home and especially its occupants. Of course, it takes a properly installed ventilation system to make sure the air you breathe is truly up to par. The right setup will protect your home from unwelcome indoor air pollutants and odors while controlling moisture levels and providing air exchange as needed.

Inadequate ventilation reveals itself in a number of ways. Be on the lookout for lingering odors or musty smells, stale or stuffy air, condensation inside or outside of windows, excessive humidity, and mold or mildew.

You've got options

Three easy ways to improve indoor air quality:

- **Spot ventilation:** Add a bath or kitchen fan near the moisture or pollution source
- **Whole-house ventilation:** Use a bath fan or a fresh air intake on the furnace along with a controller to provide fresh air
- **Heat recovery or energy recovery ventilation:** Make whole-house ventilation a part of your heating system

Three things to watch out for when improving ventilation:

- Possible backdrafting of combustion appliances
- Overventilation
- Dangerous pollutants entering your home if air sealing between the home and attached garage is not addressed

Addressing ventilation issues

A thorough assessment is the best way to evaluate the air quality in your home and pinpoint any ventilation issues. FOCUS ON ENERGY® makes the process easy. Let us connect you with a Trade Ally contractor who will assess your home using special diagnostic tools and make recommendations specific to your needs.

Cash incentives are available for eligible home improvements.

Unlock financial incentives

Review insulation and air sealing incentives or find a Trade Ally contractor to assess your home at focusonenergy.com/wholehome or call 855.339.8866.

REDUCING ENERGY WASTE ACROSS WISCONSIN

Incentives are subject to change and cannot exceed project costs. Focus on Energy, Wisconsin utilities' statewide program for energy efficiency and renewable energy, helps eligible residents and businesses save energy and money while protecting the environment. Focus on Energy information, resources and financial incentives help to implement energy efficiency and renewable energy projects that otherwise would not be completed. ©2020 Wisconsin Focus on Energy HPE-2505-1219
