

CONTROLLING MOISTURE

Protect Your Home From Moisture

Moisture in your home can lead to all kinds of issues, including poor air quality and health concerns. More often than not, moisture and mold-related issues are caused by poor ventilation, improper air sealing, and inadequate insulation between the attic and the rest of the home. Solving moisture issues can be tricky, and the damage and cost of repairs only rise the longer you wait.

The Solution

An energy assessment is the perfect first step to identifying and fixing your home's moisture issues, and FOCUS ON ENERGY® is here to help. Simply contact a certified Trade Ally contractor. They will assess your home using special diagnostic tools and make recommendations specific to your needs.

Cash rebates are available for eligible home improvements.

Identifying Moisture Issues

- Persistent and severe window or wall condensations.
- Water stains, mold, and mildew on walls or ceilings.

Sources of Moisture

- Exposed soil in crawlspace/ basement area.
- Excessive bathing, washing dishes, and cooking.
- Fish tanks or hot tubs.
- Unvented exhaust from ovens, clothes dryers, and water heaters.
- Gutters that do not drain properly.
- Leaky roof or plumbing.

When warm, moist air inside the house touches a cold surface, the water vapor in the air turns to liquid water (condensation).

Unlock Financial Rebates

Review rebates and find a Trade Ally contractor to assess your home at focusonenergy.com/wholehome or call **800.762.7077**.

REDUCING ENERGY WASTE ACROSS WISCONSIN

Rebates are subject to change and cannot exceed project costs. Focus on Energy, Wisconsin utilities' statewide program for energy efficiency and renewable energy, helps eligible residents and businesses save energy and money while protecting the environment. Focus on Energy information, resources, and financial rebates help to implement energy efficiency and renewable energy projects that otherwise would not be completed.
